Start your review of Unlimited Power: The New Science of Personal Achievement Podcast on SpotifyWelcome to EdgelIntro to Financial Freedom Intro to RPM Awakening Infinite Power along with the world's leading emerging capacity expert: ANTHONY ROBBINS Many people say the potential is innate rather than trained. If you are lucky, you have higher abilities than others, you are smarter than others, you are better than others. But Anthony Robbins thinks otherwise, the ability is something that can be fully trained. Not suddenly a friend who speaks English better than you, whether in the same class, in the same class. The difference is that his friend spends a lot of time waking up to endless abilities along with the world's leading mining industry experts: ANTHONY ROBBINS Many people say that the potential is more innate than learning. If you are lucky, you have higher abilities than others, you are smarter than others, you are better than others. But Anthony Robbins thinks otherwise, the ability is something that can be fully trained. Not suddenly a friend who speaks English better than you, whether in the same class, in the same class. The difference is that a friend spends more time in English than you, maybe he is harder or he is more methodical learning. This proves that the capacity is not quite innate. We are often entangled in a mental trap: overwhelmed by the success of others and think that they are so successful because they are pious for certain special talents. However, when we think more carefully, we find that the greatest gift that other successful people often have is the ability to motivate ourselves to act, an ability that everyone can train. Great people all share the same path to success. Anthony Robbins calls this a key formula for success: 'the first step is to clearly define what you want; The second step is action, otherwise your desire will forever remain just a dream. However, the actions we take do not always produce the desired result, so the third step is to carefully recognize feedback, action results and quickly understand that the action brings us closer to our goal, or forces us to move away from it more and more. If the results you get are not what you want, you should learn lessons for yourself. Then you move on to the fourth step - the flexibility to change your behavior until you get what you want. others to make great achievements. Chapter 6, for example. Intellectual master Anthony Robbins helps readers better understand his body. Because there is no need to re-hunt all the past things to change their condition. What we need to do is change our view from negative to positive.
